

Final thesis (m/f/d)

Tool development for a meltblown nozzle cascade
(immediately).

What tasks await you?

- Advancement of a concept for tool design
- Design, dimensioning, and calculation of the tool
- Simulation of fluid dynamics and nozzle geometry
- Simulation of melt and heat distribution

What can you expect from us?

- A young, helpful, and highly motivated team
- Flexible working hours
- Hands-on mentality and working on the product
- Daily changing challenges
- Shared lunches and team events

What do we wish from you?

- A degree in mechanical engineering
- Independent, precise, and careful work
- Willingness to learn and no aversion to physical work
- Basic knowledge in the field of simulation/construction
- Motivation and enjoyment of working in a team
